## EDUCATION

2018-2020
THIRUVALLUVAR UNIVERSITY
MSC COMPUTER SCIENCE

2014- 2017
THIRUVALLUVAR UNIVERSITY
BCA

## SKILLS

- Playwright
- Selenium
- API Testing
- Javascript
- Jenkins
- Azure
- BDD (specflow)
- WebdriverIO

## LANGUAGES

- English
- Tamil

## PROFILE SUMMARY

Automation Test Engineer with 3.10 years of experience in web and API test automation using Playwright (TypeScript), Selenium (Java/C#), and BDD frameworks (Cucumber, Specflow). Skilled in designing scalable frameworks, integrating automation into CI/CD pipelines (Jenkins, Azure), and collaborating in Agile environments to deliver robust, high-quality software solutions.

## WORK EXPERIENCE

AUTOMATION TEST ENGINEER | MAY 2022 - PRESENT
COMPANY NAME : CHANGEPOND TECHNOLOGIES

### Project : Dufry Salesforce | April 2025- Present

- Implemented automation for Salesforce Loyalty modules, including customer enrollment, referral-based programs (Friends & Family), and partner account linking.
- Automated API and UI validations using Java, RestAssured, and Cucumber.
- Built reusable payload generation and validation utilities to enhance framework efficiency.

### Project : Kansas (KITE Application) | Oct 2024 - Apr 2025

- Worked on automation for KITE, an education platform under the University of Kansas, handling question creation and assessment workflows.
- Designed Playwright-based scripts for content creation, validation, and reporting modules.
- Enhanced automation stability and reduced test maintenance overhead.

### Project : ISS (Inchcape Shipping Services ) Nov 2023 – Sep 2024

- Automated regression and smoke test suites for Optic, a marine management application.
- Implemented Selenium-based regression packs and CI/CD integration with Jenkins.
- Contributed to framework enhancements and defect analysis reports.

### Project EvoText | Jan 2023- Oct 2023

- Automated Publisher and Satellite web applications for course, assignment, and report creation workflows
- Automated UI flows and regression test cases to ensure release quality.
